Painting a GREENER FUTURE

Low VOC. High Performance

Low VOC Paints
Volatile Organic Compounds (VOCs) are emitted by a wide range of products, including different paints. In general, VOCs are emitted as gases from certain solids or liquids and include a variety of chemicals, some of which may have short- and long-term adverse health effects. Concentrations of many VOCs are consistently higher indoors (up to ten times higher) than outdoors. Low VOC paints are significantly better for the health of the user, his workplace & for the environment.

About Nax Pro LV
Nax Pro LV employs state of the art European technology that combines performance, durability and productivity for the repair shop. The comprehensive range of Nax Pro LV ancillaries is compliant to EU 2004/42 standards and our answer to the growing requirements of environment friendly smash repair shops. By using nax Pro LV series you enjoy the benefits of a highly complaint & productive system.

Products
Nax Pro LV offers a complete range of high productive 2K clears and ancillaries that includes putty, plastic primers, anti-static degreasers and other products designed to complement the latest trends in technology. Simply put, Nax Pro LV range provides excellent low VOC solutions for your collision repair shops.
Why be VOC compliant
Increasing environmental regulations & consumer awareness, have paved the way for development of low VOC paints. These new generation paints along with being durable & cost effective are less harmful to the human & environment health.

Low VOC
Low solvent emissions, less harmful to the environment & almost odorless

Environment benefits
Reduces landfill, groundwater and ozone depleting contaminants.

Health benefits
Reduced toxins benefit everyone, including those with allergies and chemical sensitivities.
2K Clearcoats

**nax Pro LV7600 VHS Performance Clear**
Low VOC Extra High solid two components clear providing deep gloss/excellent flowability, hardness and protection over Water borne and Solvent borne Basecoats. Able to be polished after 15 min @ 60°C. Ideal clearcoat for spot repair and respray.

**Features**
- Ideal for both Spot Repair and Full Respray
- One-and-half coat without flash off in small repairs
- High UV & Chemical Resistance

**Benefits**
- Singular Outstanding Solution
- High Productivity
- Durable Finish

**nax Pro LV7400 HS Clear**
Low VOC two component Clearcoat with excellent scratch resistant properties, UV resistance and weather protection over different types of basecoat. Ideal clearcoat from spot repair to respray.

**Features**
- Excellent Scratch Resistance
- One-and-half coat without flash off in small repairs
- Ideal for both Spot Repair and Full Respray

**Benefits**
- Toughest nax Pro Clear Coat Offering
- High Productivity
- Singular Outstanding Solution

**nax Pro LV7200 X'press Clear**
Low VOC 2K acrylic clearcoat that is quick drying & scratch resistant with excellent UV protection. Recommended for fast and panel repair system for both water borne and solvent borne system

**Features**
- Express Panel clear
- Scratch Resistant Solution

**Benefits**
- Polishable within 4 hrs (@ 30°C)
- Tough Coating
Primers

nax Pro LV3000 Wash Primer CF
Two-pack Low VOC chromate free, fast drying anti-corrosive primer for pre-treatment for light metals and alloys. Can be used over abrasive blasted steel to provide optimal corrosion protection and adhesion to subsequently applied coatings.

Features
- High corrosion resistance

Benefits
- Excellent Durability

nax Plastic Primer 1K
Ready to use 1K Spray Primer for all plastic parts with excellent adhesion.

Features
- Can be used on all plastics including PP mixtures thereof & also on Galvanzed Steel & Aluminium

Benefits
- Multi substrate application
nax Pro LV3601/04/07 VHS Primer Surfacer (White/Grey/Black)
Low VOC Product, Quick-drying two-pack wet on wet primer surfacer & sanding primer filler, with excellent application and sanding properties. Can be applied wet on wet on sound OEM e-coat with light scuffing & sprayed directly on well prepared plastic parts.

**Features**
- Wet on wet and dry sanding application
- Spectral Shade range
- Direct application on ED Coated panels without sanding

**Benefits**
- Versatile
- Optimized Hiding
- Easy application

nax Pro LV3200 Epoxy Primer Surfacer
Low VOC, 2K Epoxy Primer with high corrosion resistance, quick drying and excellent filling properties.

**Features**
- Wet on wet and dry sanding application
- Application of Putty for CV & I manufacturers within 30 min at 20°C
- Brilliant Filling properties over multiple substrates

**Benefits**
- Versatile
- Outstanding Productivity
- Single Stop Primer solution for CV & I
**Polyester Fillers**

**nax Pro LV Multifunctional Lightweight Bodyfiller**
Two component Multifunction polyester bodyfiller, fast drying polyester bodyfiller designed to fill and finish dents and surface irregularities in collision repair. Provides excellent application, ease of sanding, excellent adhesion to steel, galvanized steel, aluminum and small scratches in plastic.
