Painting a GREENER FUTURE

Low VOC. High Performance
Low VOC Paints

Volatile Organic Compounds (VOCs) are emitted by a wide range of products, including different paints. In general, VOCs are emitted as gases from certain solids or liquids and include a variety of chemicals, some of which may have short- and long-term adverse health effects. Concentrations of many VOCs are consistently higher indoors (up to ten times higher) than outdoors. Low VOC paints are significantly better for the health of the user, the workplace & for the environment.

About nax Pro LV

nax Pro LV employs state of the art Low VOC European technology that combines performance, durability and productivity for the repair shop. The comprehensive range of nax Pro LV ancillaries is compliant to EU 2004/42 standards and our answer to the growing requirements of Low VOC environment friendly smash repair shops. By using nax Pro LV series you enjoy the benefits of a highly compliant & productive system.

Products

nax Pro LV offers a complete range of high productive 2K clears and ancillaries that includes putty, plastic primers, anti-static degreasers and other products designed to complement the latest trends in technology. Simply put, nax Pro LV range provides excellent low VOC solutions for collision repair shops.
Why be VOC compliant
Increasing environmental regulations & consumer awareness, have paved the way for development of low VOC paints. These new generation paints along with being durable & cost effective are less harmful to the human & environment health.

Low VOC
Low solvent emissions, less harmful to the environment & almost odourless.

Environment benefits
Reduces landfill, groundwater and ozone depleting contaminants.

Health benefits
Reduced toxins benefit everyone, including those with allergies and chemical sensitivities.
**2K Clearcoats**

**nax Pro LV7600 VHS Performance Clear**
Low VOC Extra High solid two component clearcoat providing deep gloss/excellent flowability, hardness and protection over Water borne and Solvent borne Basecoats. Can be polished after 15 min @ 60°C. Ideal clearcoat for spot repair and respray.

**Features**
- Ideal for both Spot Repair and Full Respray
- One-and-half coat without flash off in small repairs
- High UV & Chemical Resistance
- Multiple hardener options (Fast & Medium)

**Benefits**
- Singular Outstanding Solution
- High Productivity
- Durable Finish
- Optimised drying

**nax Pro LV7400 HS Clear**
Low VOC two component clearcoat with excellent scratch resistant properties, UV resistance and weather protection over different types of basecoat. Ideal clearcoat from spot repair to respray.

**Features**
- Excellent Scratch Resistance
- One-and-half coat without flash off in small repairs
- Ideal for both Spot Repair and Full Respray
- Multiple hardener options (Fast, Medium & Slow)

**Benefits**
- Toughest nax Pro Clearcoat offering
- High Productivity
- Singular Outstanding Solution
- Optimised drying

**nax Pro LV7200 X’press Clear**
Low VOC 2K acrylic clearcoat that is quick drying & scratch resistant with excellent UV protection. Recommended for fast and panel repair system for both water borne and solvent borne system.

**Features**
- Express Panel clear
- Scratch Resistant Solution

**Benefits**
- Polishable within 4 hrs (@ 30°C)
- Tough Coating
**Primers**

**nax Pro LV3000 Wash Primer 2K CF**

Two-pack Low VOC chromate free, fast drying anti-corrosive primer for pre-treatment of light metals and alloys. Can be used over abrasive blasted steel to provide optimal corrosion protection and adhesion to the subsequently applied coatings.

**Features**
- High corrosion resistance

**Benefits**
- Excellent Durability

**nax Pro LV1600 Wash Primer 1K CF**

One-pack chromate free, fast drying anti-corrosive etching primer for pre-treatment of light metals and alloys. Used to provide optimal corrosion protection and adhesion to the subsequently applied coatings. Can also be sprayed with airless application.

**Features**
- Ready to use

**Benefits**
- Easy & fast application
Primers

**nax Plastics Primer 1K**
nax Plastic Primer 1K is a single component ready to use plastic adhesion promoter designed to support the adhesion of primers/surfacers and 2K topcoats to common plastic parts found in automotive refinishes including Polypropylene and its blends. It also adheres to various metal substrates.

**Features**
- Can be used on all plastics including PP mixtures thereof & also on Galvanized Steel & Aluminium

**Benefits**
- Multi substrate application

**nax Pro LV1001 Plastics Primer 1K (Aerosol)**
nax Pro LV1001 Plastic Primer 1K Aerosol is a single component ready to use aerosol plastic adhesion promoter designed to support the adhesion of primers/surfacers and 2K topcoats to common plastic parts found in automotive refinishes including Polypropylene and its blends. It also adheres to various metal substrates.

**Features**
- Wide variety of substrates including all types of plastics, polyester laminates, galvanized iron, aluminium, steel and SS substrates

**Benefits**
- Multi substrate application

**nax Pro LV1101 DTM Epoxy Spot Sealer (Aerosol)**
nax Pro LV1101 DTM Epoxy Spot Sealer Aerosol is a versatile direct to metal epoxy based aerosol primer. Designed for covering exposed bare metal after sanding the primer surfacer, prior to application of WB basecoat. Due to its anti-corrosive properties, it can be used as primer and spot primer for small repairs. Can also be used in wet on wet or sanding application.

**Features**
- Can be used in wet on wet and sanding applications

**Benefits**
- Extremely Versatile
**Filler Surfacer**

**nax Pro LV3601/04/07 VHS Primer Surfacer (White/Grey/Black)**

Low VOC quick-drying two-pack wet on wet primer surfacer & sanding primer filler, with excellent application and sanding properties. Can be applied wet on wet on sound OEM e-coat with light scuffing & sprayed directly on well prepared plastic parts.

**Features**
- Wet on wet and dry sanding application
- Spectral Shade range
- Direct application on ED Coated panels without sanding

**Benefits**
- Versatile
- Optimised Hiding
- Easy application

**nax Pro LV3200 Epoxy Primer Surfacer**

Low VOC, 2K Epoxy Primer with high corrosion resistance, quick drying and excellent filling properties.

**Features**
- Wet on wet and dry sanding application
- Application of Putty for CV & I manufacturers within 30 min at 20°C
- Brilliant Filling properties over multiple substrates

**Benefits**
- Versatile
- Outstanding Productivity
- Single Stop Primer solution for CV & I
Polyester Fillers

**nax Pro LV Multifunctional Lightweight Bodyfiller**
Two component Multifunction polyester bodyfiller, fast drying polyester bodyfiller designed to fill and finish dents and surface irregularities in collision repair. Provides excellent application, ease of sanding, excellent adhesion to steel, galvanized steel, aluminum and small scratches in plastic.

**Features**
- Can be used on Al/MS/Galvanized/Small plastic repairs
- Excellent filling
- One Step Filling & Finishing

**Benefits**
- Multisubstrate application
- Usable for larger dents
- Complete Filler Solution

**nax Pro LV2000 Lightfilling Putty**
2K Polyester filler/putty designed to fill dents and surface irregularities in collision repair. Provides easy application, filling and treatment is good for small and large repair area. The putty has good adhesion to steel and aluminium sheets.

**Features**
- Ease of application
- Excellent Sanding
- Good Adhesion

**Benefits**
- Smooth Finish
- Minimal Effort
- Durable

**nax Spot Filler 1K**
nax Spot Filler 1K is a finishing putty, to fill very small scratches and surface defects directly before coating with all acrylic base products.

**Features**
- Minor Scratches and pinholes

**Benefits**
- Usable with ALL Nax Preparatory Products
Auxiliaries

Thinners
nax Pro LV range has a complete assortment of thinners that supplement and control the drying speed of clearcoats, Primers, Surfacers, and other products, thereby providing optimal drying & performance in varied application conditions.

Product range includes:
- nax Pro LV5000 Thinner Slow
- nax Pro LV5000 Thinner Medium
- nax Pro LV5000 Thinner Fast

Topcoat Blending Thinners
The fade-out thinners range provide very easy application, ease to blend topcoats & clearcoats, good flow levelling. Ideal fade-out thinner for levelling optical difference in colour and joints.

Features
- Ready to use
- Excellent for leveling optical difference in colours/joints

Benefits
- Easy application
- Ideal fade-out thinner

Product range includes:
- nax Pro LVS100 Topcoat Blending Thinner
- nax Pro LVS101 Topcoat Blending Thinner
nax Pro LV4200 Flexible Additive
nax Pro LV4200 Flexible Additive gives flexibility to the paint to suit application on flexible surfaces. Mainly used in paint application on plastic parts. Can also be used on elasticise paint coatings on the metal which eliminates exposure to stone chipping.

Features
- Suitable for multi substrate application like ED coated, Fillers, Surfacers, Steel, Aluminum & GI

Benefits
- Universal degreasing solution

nax Pro LV100 Universal Degreaser
nax ProLV100 Universal Degreaser is an excellent multi use degreaser designed to efficiently clean all types of substrates found in automotive refinishes. It easily removes heavy contamination of grease, silicon, dirt & oil. Efficient first step degreaser of the surface preparation process.

Features
- Suitable for multi substrate application like ED coated, Fillers, Surfacers, Steel, Aluminum & GI

Benefits
- Universal degreasing solution

nax Pro LV300 Anti-Static Degreaser
Degreaser with antistatic properties designed especially for plastic parts to minimize the static charge caused by friction from the cleaning cloth during degreasing. It easily removes grease, silicon, dirt, and oil and it can also be used for cleaning bare metal, primer surfacers or existing finishes.

Features
- Excellent for using on plastic parts

Benefits
- Anti-static properties

nax Pro LV4200 Flexible Additive
nax Pro LV4200 Flexible Additive gives flexibility to the paint to suit application on flexible surfaces. Mainly used in paint application on plastic parts. Can also be used on elasticise paint coatings on the metal which eliminates exposure to stone chipping.
nax Pro LV4100 Anti-Silicone
nax Pro LV4100 Anti-Silicone prevents pinholes which occur after contamination of surfaces with silicone or by grease. When added to paint it prevents formation of craters (fish eye) in case of improperly cleaned surface.

nax Pro LV4000 Accelerator
nax Pro LV4000 Accelerator reduces the drying and curing time of two-component acrylic & polyurethane products. It is specially recommended for low temperature and high humidity applications.

nax Pro LV1201 Acrylic Matt Black Aerosol
Quick-drying acrylic topcoat with very good covering properties, intended for painting wooden, metal and aluminium surfaces as well as old varnish coats and polyester laminates. The product has the fan nozzle, which ensures that the application properties of the spray jet are similar to those of a conventional spray gun nozzle.
